01 Turn the OneStep+ on by moving the **ON/OFF switch** to the ON position, and check that the **Flash LED** is green.

02 Slide the **film door latch** to open the film door.

03 Insert the film pack with the darkslide cover facing up.

04 Close the film door. The darkslide will eject automatically beneath the **film shield**. Lift the film shield and allow it to roll back up, then remove the darkslide.

05 Select the lens you want to use with the **lens switch** (standard for regular photos, or portrait for close-ups) and compose your picture, aligning your eye with the **viewfinder**.

06 Hold the camera steady and press the **shutter button**. The flash will trigger automatically. To shoot without flash, press and hold the **flash override button** on the back while pressing the shutter button.

07 Your photo will eject beneath the **film shield**. After five seconds, lift the film shield, allow it to retract in the camera, then remove your photo.

08 Don’t shake or bend the photo! Shield it from light (in a pocket, or face down on a flat surface) until the image begins to emerge – black & white photos take 5-10 minutes, while color pictures take 10-15 minutes.
One Step+ i-Type Camera Quick Start Guide

Nav# 340213

**Plus Button**
- Press once: Bluetooth ON/OFF
- Hold for 3s: Pairing mode
- Tap twice: Self-timer

**Led Notifications**
- **No light**: Bluetooth/Self-timer OFF
- **Blinking blue**: Camera is in pairing mode and ready to connect
- **Solid blue**: Camera is connected to a smartphone
- **Solid orange**: Self-timer mode activated
- **Blinking orange**: Self-timer is counting down to take photo

**LED Film Counter**
- **Blinking rapidly**: No film inserted or no shots remaining
- **Solid lights**: Current film count (e.g., 4 LEDs = 4 shots remaining)

**Check your camera’s charge level**
- Press and hold the Plus button A while turning on. The LED film counter will light up corresponding with your camera’s charge level (e.g., 6 LEDs = 75%)

**Lighten/Darken Switch**
